School nurses are uniquely qualified to provide leadership to the school health professional team. In addition, school nurses are expected to manage the direct and indirect health needs of the entire student population, including coordination of the complex medical care of students with special needs. These formidable tasks require powerful management tools.

Today you are being asked to do more than ever. Let our EHR software support you in this role. SNAP Health Center provides complete and secure clinical management software and services for school districts of all sizes, and does it better than anyone else.

Caring Through Technology
SNAP Health Center is a fully integrated Electronic Health Record (EHR) clinical documentation system that utilizes superior design and technology to achieve better student health outcomes by streamlining workflow, increasing communication, and providing comprehensive health data analysis in a paperless FERPA and HIPAA environment.

SNAP Health Center is a comprehensive solution that features easy-to-use technology while complementing nursing expertise. Designed to accommodate the workflow preferences and expectations of school health professionals, districts of all sizes see higher performance and efficiency. To match the work style and clinical approach of every nurse, SNAP Health Center works, thinks, and moves like a nurse.

All-in-one Solution
• Automatic SIS data import
• Appointment manager
• Electronic copy of health data
• Form Tracking
• Clinical student history
• Clinical visit log
• Visit templates
• 3-D body image
• Health alerts / Problem list
• Medication management
• Mosby Nursing Drug Reference
• Screening documentation
• Screening device automation
• Concussion evaluation
• BMI & peak flow charting
• Interactive glucose charting
• Customizable pick lists
• Special Ed notification
• NASN Data Set collection

Flexible Solutions
• Windows® or Mac®
• Web or Client/Server
• iPad® or Tablet
• Lease or Own
• Optional Cloud Services

How Will SNAP Health Center Benefit Your Practice?

Accuracy An incomplete health record can be just as dangerous as no record at all. Complete and precise documentation means fewer medical errors, resulting in healthier students who are able to attend more classes and learn at a higher rate. SNAP Health Center eliminates redundant data entry and utilizes a point-and-click interface making documentation easy, consistent, and precise. In a recent survey, greater than 99% of SNAP users reported passing state immunization audits with flying colors.

Meaningful Use Data that was formerly inconsistent and too overwhelming to analyze is now delivered in a clinically useful format. With SNAP Health Center, nurses are able to improve delivery of health care in a more efficient, safe, and cost-effective way. Automatic BMI charting, concussion evaluation, peak flow, and diabetic tracking provide extensive insight into the health of the school district. Individual Healthcare Plans are fully integrated into the EHR to provide a comprehensive plan for each student. With immediate access to patient data, practicing preventive care now becomes attainable.

Communications SNAP Health Center facilitates high-level communication with district staff, parents, and outside providers producing more effective results. The SNAP Health Portal streamlines communication with parents while dramatically reducing workload. Simply emailing letters can increase referral completion rate by over 40%. Sharing real-time health trends with state DPH allows nurses to play a key role in tracking trends such as influenza-like illnesses, acute gastrointestinal incidences, and potential cases of bioterrorism.

Efficiency A well-designed EHR allows nurses to spend between 15-26% more time caring for students. Inspired by an RN, SNAP Health Center works the way nurses think. Feature-rich SNAP Health Center helps expedite workflow, increase automation, and improve practice operations. With the click of a button, reduce screening completion time in half by group processing results and form letters. Intuitive design, customized work flow, and timesaving shortcuts expedite documentation and promote accuracy.

“SNAP is great! My tech people here rank you guys as one of the best companies ever....rock on as they are CRITICS!!!!”

- Mary McKenna BSN, RN, Director of Health and Safety Services
  Georgetown Independent School District, Georgetown, TX
Student Data Interface  It is imperative that your EHR software easily interfaces with the district Student Information System (SIS). SNAP Health Center includes sophisticated tools that capture student and critical health data from all SISs. Designed in a way IT professionals appreciate and understand, the seamless data interface provides reliable and accurate data transfer. As an established ISV Partner with many dedicated partners, SNAP Health Center greatly enhances the functionality of your SIS.

Data Security  Security is an absolute priority. Patient confidentiality should never be taken lightly. SNAP Health Center maintains the highest security standards. FERPA and HIPAA compliance ensure data remains secure and protected at all times. To protect from legal ramifications, access to data is controlled by customized logins, specialized PINs, user access log, and a behind the scenes audit trail. Secure cloud services provide peace of mind in the event of natural disaster or fire.

Cost Savings  In these tough economic times, schools are being asked to provide more services with fewer resources. A well designed EHR quickly pays for itself in the first year of implementation. Start reducing costs immediately by eliminating printing, mailing, and office supply costs. Improve student health while maximizing the financial health of your district. Integrated billing helps recover revenue for services provided to Medicaid-eligible children offering financial support to help meet the increased demand for nursing services.

Ingenuity  PSNI is keenly aware of the challenges school nurses face and continually designs innovative health IT solutions. To help automate health clinics, SNAP Health Center works in tandem with screening devices. Health screening automation transmits screening results directly from the screener into student health records. To address the growing concern for sports related concussions, SNAP Health Center offers the first EHR with SCAT3 assessment test integration.

Our competition rate for referrals jumped from 63 to 92 percent when we started using [SNAP].”  
– Marie DeSisto, Nurse Administrator and MA director of NASN (as seen in the ONC Health IT Buzz Blog on 5/9/2012, www.healthit.gov)

All-in-one Solution
• State specific vaccine import
• Vaccine compliance evaluation
• Data mining reports
• Individual healthcare plans
• Real-time health surveillance

New!
• Parent Health Portal

New!
• Risk management
• Email encryption
• Scanned document storage
• Group processing
• Form letters
• Foreign language letters
• Transmit EHRs between schools
• Custom user security settings
• Data encryption
• FERPA / HIPAA compliance
• Security breach alert
• Audit tracking

New!
• Direct Medicaid billing
• File Attachments

Designed for:
• Small districts (1-10 schools)
• Large districts (11-250+ schools)
• Public & Private schools
• Residential schools
• International campuses
• Colleges

PSNI™
Who We Are: PSNI is a nurse-owned software company whose mission is to make the work of the school nurse more efficient and effective. Since 1992, we have been committed to blending the best of nursing informatics with state of the art computer science. Our proven track record of anticipating and staying ahead of changing technologies and medical trends has allowed us to remain the leader in student health documentation. When making the important decision of implementing a new EHR system, be sure to choose a partner, not just a product.

Training: Everyone has a unique learning style, schedule, and budget. Specialized teaching strategies developed by our RNs help to accelerate the learning process and minimize stress. Online Video Trainings are included with purchase. PSNI also offers on-site and e-learning alternatives.

Implementation and Support: Experience a smooth transition and fast start-up with SNAP Live². This intuitive and comprehensive tool allows data interface with all Student Information Systems and ensures information accuracy, security, and integrity. Our onsite support team of nurses and engineers are always available to help guide and answer questions. PSNI prides itself on offering the friendliest, most accessible and helpful support in the industry.

Cloud Services: Radically changing how electronic health care is performed, access SNAP Health Center anytime, anywhere. With a proven high availability solution, our state of the art data center eliminates unplanned downtime and the risk of data loss. Cloud services prevents the headaches of ongoing maintenance, time and money in IT support, and equipment costs.
