PSNI Support Team
PSNI has built a strong reputation for providing the most accessible, helpful and friendly support in the industry. Registered nurses and software engineers, who understand your needs and the importance of accurate health record documentation, staff our support phone lines, and are ready to help you with the most complex software support available. Calls are never outsourced or directed out of the country.

About Us
PSNI is a nurse-owned software company whose mission is to make the work of the school nurse easier, efficient and more effective. As president of the company, and a clinical specialist with 3 years of school nursing experience, I strongly believe technical advancements must be tempered with a human touch and expert judgment. “Caring through Technology” is our company’s motto and we are committed to blending the best of nursing informatics with state-of-the-art computer science. Our company pride itself on providing friendly, personalized and knowledgeable service. We continue to expand our product line with innovative software solutions focused on the unique health needs of students within the school environment.

Sharon Redes, MSN, RN
President of Professional Software for Nurses, Inc.

Student Outcomes & Productivity
Facilitating positive health outcomes is critical in helping students succeed academically. With tools to expedite documentation, the health staff can focus more on student care. With SNAP Health Center’s unique processing features, school nurses have been able to cut their routine documentation time by more than one third!

PSNI has built a strong reputation for providing the most accessible, helpful and friendly support in the industry. SNAP for the Web
- Run SNAP Health Center from any web browser
- One installation services entire district
- Mix client/server and web access
- Same full-featured user interface
- Operates on Mac/Windows/Linux
- Hosting option available

SNAP Live
The most advanced method to keep student data in SNAP Health Center updated from your SIS.
- Saves IT time and effort
- Auto-update district updates
- Works with any ODBC compliant SIS
- Automatic error reporting
- Imports more than 60 fields
- Supported implementation

Cost Effective Solution
At PSNI, we understand that you are being asked to provide more services with fewer resources. Ask about leasing, hosting services, or our budget friendly components.

SNAP Health Center
School Health Software

The program is very user-friendly and allows for customization to meet the needs of the students and nurses. SNAP has made a tremendous difference in our daily workflow. It has improved our ability to monitor and track student health services and student outcomes.

Marie DeSisto, RN, MSN • Director of Nurses
Waltham Public Schools (Waltham, MA)

Caring Through Technology

Need to replace your EHR software?
PSNI has helped replace hundreds of electronic health records software systems. Whether your current system is inadequate, out-of-date, or discontinued, PSNI is actively performing data conversions from competitive software programs. Learn more about our competitive product discount to help ease the burden of replacing your EHR or complement your Student Information System’s (SIS) health module.

SNAP Health Center supplies the tools you need for multi-tasking, organizing, and saving time, which is the foundation of a successful practice. SNAP provides an accurate and complete clinical picture of each student and streamlines clinical documentation in one comprehensive system. With meticulous focus on customizability, reliability, and flexibility, SNAP Health Center is designed to work like nurses think.

All-in-one Electronic Health Records (EHR) software solution designed specifically for the school health clinic

SNAP Health Center supplies the tools you need for multi-tasking, organizing, and saving time, which is the foundation of a successful practice. SNAP provides an accurate and complete clinical picture of each student and streamlines clinical documentation in one comprehensive system. With meticulous focus on customizability, reliability, and flexibility, SNAP Health Center is designed to work like nurses think.

The right EHR has the potential to minimize errors, reduce liability, decrease costs, and simplify administrative tasks allowing more time to focus on nursing care. That’s why thousands of schools have chosen SNAP Health Center as their solution. With SNAP you hit the ground running without having to endure the downtime of other cumbersome EHR packages.

Professional Software for Nurses, Inc. (PSNI) was founded by a school nurse in 1992. PSNI has remained the leader in electronic school nursing documentation due to a proven track record of anticipating and staying ahead of continuously changing technologies and medical trends. When making the important decision of implementing a new EHR system into your school district, be sure that you choose a partner not just a product.

SNAP Health Center’s unique features save you time and improve productivity

- **Emailing:** Save time while facilitating communications with student contacts. Expose form letter submissions ever further by coupling with group processing below.
- **Group Processing:** A time-saving tool designed to make data entry fast and easy. Simultaneously apply information to groups of student records and generate customized letters with a single click.
- **Flexibility & Customizability:** Tailor workflows to enhance consistency of documentation across all schools in your district.
- **Form Letters / Multi-Lingual Letters:** Create an infinite number of letters with student specific data in any language.
- **Integrated Billing Reports:** Submit Medicaid claims to the clearance house of your choice-maximizing district revenues.
- **Health Surveillance Automation:** Automatically record results from your screening devices into SNAP.
- **Health Trends Notification:** Track the scenarios monitoring health occurrences with immediate notifications to alert your district of potential outbreaks and cluster cases.
- **Multi-Task Support:** Multiview design supports documenting multiple students simultaneously.
